

Argon Cut to Length

Monday, 06 August 2007

Argon Technology just completed another successful cut to length system install. Retrofitted to an existing line the upgraded control system provided a much need process and quality improvement. The new line now operates to capacity and can be remotely monitored.

Are you looking to install or do you operate a process line requiring automated process control?
Do you need a cut to length system?
an upgrade solution?

then contact Argon.
